New & Improved Library Mobile App Now Available

Access your library from anywhere on your smart phone or other mobile device.

With our mobile app you can browse or search for titles, place holds, access your account or get in touch with your home library. We also think you'll enjoy the integration with Library2Go ebook titles and the ability to search for a book by simply scanning its barcode or QR code.

For Apple and Android users, you'll find the app in the [iTunes](#) store or [Google Play](#). You can also use either of two mobile browser-based versions

[Mobile browser](#) (comparable to the app but lacks some features)

[Universal version](#) (no-frills mobile access)
