Statistics compiled by faculty from Oregon State University's Rural Studies Program  
 Funding for the Rural Communities Explorer development was provided by The Ford Family Foundation, OSU Libraries, and O:

\*\* MOE: MOE stands for "margin of error."  
 The margin of error (MOE) here represents the degree of uncertainty for each estimate arising from sampling variability.  
 This margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate mi  
 The data from the U.S. Census Bureau's American Community Survey have margins of error associated with them because the  
 The effect of nonsampling error is not represented in these American Community Survey estimates.

is 90 percent certainty was set by the U.S. Census Bureau.

| Details   |   |
|---|---|
| Definition  | Formula   |
| The total number of individuals enumerated by the US Census Bureau. <br /><br />  |   |
| The total number of individuals estimated by the US Census Bureau during inter-censal years. <br /><br />   |   |
| The percentage of the population who live in areas designated as rural by the U.S. Census Bureau. Rural is considered to be all territory, population and housing units not in urbanized areas and not in places of more than 2,500 persons outside of urbanized areas. | Formula: $(\text{rural population} / \text{total population}) * 1$  |
| The age at which 50% of the population is younger and 50% is older.   |   |
| The age at which 50% of the population is younger and 50% is older.   |   |
| A vertical bar graph that shows the age and sex structure of the population. Each bar represents the proportion of the population in a five-year age group during the year and each side of the graph shows the proportion of that age group that is female or male.    | Formula for each bar: $(\text{population in age-gender group} / \text{total population}) * 10$  |
| A vertical bar graph that shows the age and sex structure of the population. Each bar represents the proportion of the population in a five-year age group during the year and each side of the graph shows the proportion of that age group that is female or male.    | Formula for each bar: $(\text{population in age-gender group} / \text{total population}) * 10$  |
| The number of members of families divided by the total number of families, where a family is a group of two or more people who reside together and who are related by birth, marriage, or adoption.   | Formula: $[\# \text{ of all people in families}] / [\# \text{ of familie}]$   |
| The number of members of families divided by the total number of families, where a family is a group of two or more people who reside together and who are related by birth, marriage, or adoption.   | Formula: $[\# \text{ of all people in families}] / [\# \text{ of familie}]$   |
| The number of people who share a housing unit as their usual place of residence divided by the total number of households.  | Formula: $[\# \text{ of all people in households}] / [\# \text{ of household}]$   |
| The number of people who share a housing unit as their usual place of residence divided by the total number of households.  | Formula: $[\# \text{ of all people in households}] / [\# \text{ of household}]$   |
| The percentage of families that have children under 18 years old as measured by the decennial census.   | Formula: $(([\# \text{ married-couples with children under 18}] + [\# \text{ single men with own children under 18}] + [\# \text{ single women with own children under 18}]) / [\text{total \# of families}] * 1$ |
| Estimate of the percentage of families that have children under 18 years old.   | Formula: $(([\# \text{ married-couples with children under 18}] + [\# \text{ single men with own children under 18}] + [\# \text{ single women with own children under 18}]) / [\text{total \# of families}] * 1$ |

|  |   |
|--|---|
| Of families with children, the percentage headed by a single parent, either male or female.  | Formula: $((\text{\# single men with own children under 18} + \text{\# single women with own children under 18}) / \text{[total number of families with children under 18]}) * 10$  |
| Of the estimated families with children, the percentage headed by a single parent, either male or female.  | Formula: $((\text{\# single men with own children under 18} + \text{\# single women with own children under 18}) / \text{[total number of families with children under 18]}) * 10$  |
|  |   |
|  |   |
|  |   |
|  |   |
| <b>***COUNTY LEVEL DATA***</b>The percent of live births that are to unmarried women.  | .Formula: $(\text{[number of births to unwed women]} / (\text{[number of births to unwed women]} + \text{[number of births to wed women]})) * 1$  |
|  |   |
|  |   |
| <b>***COUNTY LEVEL DATA***</b>   | >Formula: $(\text{[number of pregnancies to females age 15-17]} / \text{[number of females age 15-17]}) * 10$   |
|  |   |
|  |   |
|  |   |
|  |   |
|  |   |
|  |   |
|  |   |
|  |   |
|  |   |
| <b>***COUNTY LEVEL DATA***</b>   | >Formula: $(\text{[total \# of drop outs]} / \text{[total \# enrolled as of October 1]}) * 10$  |
| The percentage of the population age 25+ with High School equivalency or greater education.  | Formula: $(\text{\# people over 25 with high school equivalent} + \text{\# with some college} + \text{\# with associate's} + \text{\# with 4-year degree} + \text{\# with master's} + \text{\# with professional degree} + \text{\# with doctorate}) / \text{[total population over 25]} * 1$ |
| The percentage of the population age 25+ with 4-year degree or greater education.  | Formula: $(\text{\# people over 25 with 4-year degree} + \text{\# with master's} + \text{\# with professional degree} + \text{\# with doctorate}) / \text{[total population over 25]} * 10$   |
| <b>***COUNTY LEVEL DATA***</b>The percentage of children entering school that meet readiness standards in six developmental dimensions (physical well-being, language use, approach to learning, cognition and general knowledge, motor development and social/emotional development), as assessed by Kindergarten teachers. 2004 data used for 2005 |   |

|   |   |
|---|---|
| <b>***COUNTY LEVEL DATA***</b>Qualification is based on the Department of Health and Human Services federal poverty guidelines for a given household size. Households with net income at or below 130% of the guidelines qualify for free lunches; those between 130% and 185% qualify for reduced price lunches. | Formula: $\frac{(\text{\# eligible for free lunch}) + (\text{\# eligible for reduced price lunch})}{\text{total enrolled students}} * 10$               |
| The percentage of 3rd graders who met or exceeded the required reading scores on the state standardized test.   |   |
| The percentage of 5th graders who met or exceeded the required reading scores on the state standardized test.   |   |
| The percentage of 8th graders who met or exceeded the required reading scores on the state standardized test.   |   |
| The percentage of 3rd graders who met or exceeded the required math scores on the state standardized test.  |   |
| The percentage of 5th graders who met or exceeded the required math scores on the state standardized test.  |   |
| The percentage of 8th graders who met or exceeded the required math scores on the state standardized test.  |   |
| The household income at which 50% of households in the population earn less and 50% earn more.  |   |
| Each bar represents the number of households with annual income in that income range.   |   |
| The percentage of households receiving public assistance income.  | Formula: $\frac{(\text{\# households with public assistance income})}{\text{\# of all households}} * 10$  |
| The percentage of households receiving retirement income.   | Formula: $\frac{(\text{\# households with retirement income})}{\text{\# of all households}} * 10$   |
| The percentage of households receiving social security income.  | Formula: $\frac{(\text{\# households with social security income})}{\text{\# of all households}} * 10$  |
| The percentage of households receiving wage & salary income.  | Formula: $\frac{(\text{\# households with wage \& salary income})}{\text{\# of all households}} * 10$   |
| The percentage of individuals whose family income falls below the poverty threshold for their family size.  | Formula: $\frac{(\text{\# of individuals below poverty line})}{\text{\# of people for whom poverty status is determined}} * 10$                         |
| The percentage of individuals with family income less than or equal to 185% of the poverty threshold that corresponds to their family size.   | Formula: $\frac{(\text{\# of individuals with income less than 185\% of poverty level})}{\text{total individuals with poverty status determined}} * 10$ |
| The percentage of individuals with family income less than 50% of the poverty threshold that corresponds to their family size.  | Formula: $\frac{(\text{\# of individuals at 50\% of poverty})}{\text{total \# of people for whom poverty status is determined}} * 10$                   |
| The percentage of children under 18 whose families' income falls below the poverty threshold for their family size.   | Formula: $\frac{(\text{\# of children with income less than poverty level})}{\text{total children with poverty status determined}} * 10$                |
| <b>***COUNTY LEVEL DATA***</b>Per capita personal income expressed as a percentage of the US per capita personal income.  | Formula: $\frac{(\text{local per capita income})}{\text{U.S. per capita income}} * 10$  |

|   |   |
|---|---|
| <p>&lt;b&gt;***COUNTY LEVEL DATA***&lt;/b&gt;The professional services industry includes investment advice, advertising agencies, engineering services, architectural services, accounting services, management consulting services, and legal services. It identifies the proportion of covered employment (covered by unemployment insurance) in professional services relative to the national proportion.</p> |   |
| <p>&lt;b&gt;***COUNTY LEVEL DATA***&lt;/b&gt;The share of workers in occupations that involve a high level of 'thinking creatively.' This skill element is defined as 'developing, designing, or creating new applications, ideas, relationships, systems, or products, including artistic contributions.'</p>  | <p>Formula: (<math>\frac{\text{\# employed in creative class occupations}}{\text{total \# employed}}</math>)*10</p>         |
| <p>The percentage of the current population that lived in a different house 5 years previous.</p>   | <p>Formula example: (<math>\frac{\text{\# lived in different house one year prior}}{\text{total population}}</math>)*10</p> |
| <p>The percentage of the current population that lived in a different house in the previous year.</p>   | <p>Formula example: (<math>\frac{\text{\# lived in different house one year prior}}{\text{total population}}</math>)*10</p> |

| <p><b>***COUNTY LEVEL DATA***</b>The natural amenities scale is a national measure of the physical characteristics of a county area that enhance the location as a place to live. The scale was constructed by combining six measures of climate, typography, and water area that reflect environmental qualities most people prefer. These measures are warm winter, winter sun, temperate summer, low summer humidity, topographic variation, and water area. The natural amenities <b>rank</b>, reported here, ranks all US counties by thier scale value. Ranks run from 1 – 7; all Oregon values are 4, 5, or 6. 4 = average amenities, 5 = moderate amenities, and 6 = moderate high amenities.</p> |  |
| <p><b>***COUNTY LEVEL DATA***</b>Includes commercial banks insured by the FDIC. These institutions are regulated by one of the three Federal commercial bank regulators (FDIC, Federal Reserve Board or Office of the Comptroller of the Currency). They submit financial reports to the Federal Reserve (state member banks) or the FDIC (state non-member banks and national banks).</p>  |  |
| <p><b>***COUNTY LEVEL DATA***</b>A branch/office is any location, or facility, of a financial institution, including its main office, where deposit accounts are opened, deposits are accepted, checks paid, and loans granted. Some branches include, but are not limited to, brick and mortar locations, detached or attached drive-in facilities, seasonal offices, offices on military bases or government installations, paying/receiving stations or units, and Internet and Phone Banking locations where a customer can open accounts, make deposits and borrow money.</p>  |  |
| <p><b>***COUNTY LEVEL DATA***</b>Amount of deposits (in \$1,000,000s).</p>  |  |

|   |  |
|---|--|
| <p>&lt;b&gt;***COUNTY LEVEL DATA***&lt;/b&gt;Includes FDIC-insured savings institutions that operate under state or federal banking codes applicable to thrift institutions. These institutions are regulated by and submit financial reports to one of two Federal regulators (FDIC or Office of Thrift Supervision)</p>   |  |
| <p>&lt;b&gt;***COUNTY LEVEL DATA***&lt;/b&gt;A branch/office is any location, or facility, of a financial institution, including its main office, where deposit accounts are opened, deposits are accepted, checks paid, and loans granted. | <p><b>COUNTY LEVEL DATA</b></p> <p>Creative Class County: if yes, this county scored in the top quarter nationwide for creative class employment rates. Creative Class employment is in occupations that involve a high level of 'thinking creatively.' This skill element is defined as 'developing, designing, or creating new applications, ideas, relationships, systems, or products, including artistic contributions.'</p>  |  |
| <p><b>COUNTY LEVEL DATA</b></p> <p>One of six mutually exclusive economic categories developed by the US Department of Agriculture's Economic Research Service (only 5 apply in Oregon):</p> <ul style="list-style-type: none"> <li><b>Farming-dependent:</b> either 15 percent or more of average annual labor and proprietors' earnings derived from farming during 1998-2000 or 15 percent or more of employed residents worked in farm occupations in 2000.</li> <li><b>Manufacturing-dependent:</b> 25 percent or more of average annual labor and proprietors' earnings derived from manufacturing during 1998-2000.</li> <li><b>Federal/State government-dependent:</b> 15 percent or more of average annual labor and proprietors' earnings derived from Federal and State government during 1998-2000.</li> <li><b>Services-dependent:</b> 45 percent or more of average annual labor and proprietors' earnings derived from services (SIC categories of retail trade; finance, insurance, and real estate; and services) during 1998-2000.</li> <li><b>Nonspecialized:</b> did not meet the dependence threshold for any one of the above industries.</li> </ul> |  |

**COUNTY LEVEL DATA** When listed, the county falls into one or more of these non-mutually exclusive designations developed by the US Department of Agriculture's Economic Research Service:

- Housing stress:** 30 percent or more of households had one or more of these housing conditions in 2000: lacked complete plumbing, lacked complete kitchen, paid 30 percent or more of income for owner costs or rent, or had more than 1 person per room.
- Low-education:** 25 percent or more of residents 25-64 years old had neither a high school diploma nor GED in 2000.
- Low-employment:** less than 65 percent of residents 21-64 years old were employed in 2000.
- Nonmetro recreation:** classified using a combination of factors, including share of employment or share of earnings in recreation-related industries in 1999, share of seasonal or occasional use housing units in 2000, and per capita receipts from motels and hotels in 1997.
- Retirement destination:** number of residents 60 and older grew by 15 percent or more between 1990 and 2000 due to immigration.

**COUNTY LEVEL DATA** A metro area, as defined by the U.S. Office of Management and Budget, includes one or more counties containing a core urban area of 50,000 or more people, together with any adjacent counties that have a high degree of social and economic integration (as measured by commuting to work) with the urban core. OMB also defines micropolitan statistical areas using the same method but centered around urban areas with at least 10,000 but no more than 50,000 people. 2004 designation used for 2005.

**\*\*\*COUNTY LEVEL DATA\*\*\***  
**Urban Influence Codes**

- 1 Large-in a metro area with at least 1 million residents or more
- 2 Small-in a metro area with fewer than 1 million residents
- 3 Micropolitan area adjacent to a large metro area
- 4 Noncore adjacent to a large metro area
- 5 Micropolitan area adjacent to a small metro area
- 6 Noncore adjacent to a small metro area with town of at least 2,500 residents
- 7 Noncore adjacent to a small metro area and does not contain a town of at least 2,500 residents
- 8 Micropolitan area not adjacent to a metro area
- 9 Noncore adjacent to micro area and contains a town of at least 2,500 residents
- 10 Noncore adjacent to micro area and does not contain a town of at least 2,500 residents
- 11 Noncore not adjacent to a metro/micro area and contains a town of 2,500 or more residents
- 12 Noncore not adjacent to a metro/micro area and does not contain a town of at least 2,500 residents

**1993 Urban Influence Codes**

- 1 Large-in a metro area with at least 1 million residents or more
- 2 Small-in a metro area with fewer than 1 million residents
- 3 Adjacent to a large metro area and contains a city of at least 10,000 residents
- 4 Adjacent to a large metro area and does not have a city of at least 10,000 residents
- 5 Adjacent to a small metro area and contains a city of at least 10,000 residents
- 6 Adjacent to a small metro area and does not have a city of at least 10,000 residents
- 7 Not adjacent to a metro area and contains a city of at least 10,000 residents
- 8 Not adjacent to a metro area and contains a town of 2,500- 9,999 residents
- 9 Not adjacent to a metro area and does not contain a town of at least 2,500
